Contents of Volume 13 1999

Number 1 January–March

Incorporating multiple levels of analysis into occupational stress research *Paul D. Bliese and Steve M. Jex* 1

Persoonality and organizational health: the role of conscientiousness *Renée L. Miller, Mark A. Griffin and Peter M. Hart* 7

The impact of learning opportunities and decision authority on occupational health *Aslaug Mikkelsen, Per Øystein Saksvik, Hege R. Eriksen and Holger Ursin* 20

Relationship between job control, work pressure and strain: studies in the USA and in The Netherlands *Pascale Carayon and Fred Zijlstra* 32

A cross-validation of a structural equation model of accidents: organizational and psychological variables as predictors of work safety *J. M. Tomás, J. L. Meliá and A. Oliver* 49

Different strategies for managing the work/non-work interface: a test for unique pathways to work outcomes *Catherine Kirchmeyer and Aaron Cohen* 59

Work-related and individual determinants of the three burnout dimensions *Peter P. M. Janssen, Wilmar B. Schaufeli and Inge Houkes* 74

Number 2 April–June

The Job Demand-Control(-Support) Model and psychological well-being: a review of 20 years of empirical research *Margot van der Doef and Stan Maes* 87

The Job Demands–Job Control Model and absence behaviour: results of a 3-year longitudinal study *Peter G. W. Smulders and Frans J. N. Nijhuis* 115

Psychosocial work environment and mental health among travelling salespeople *Vilhelm Borg and Tage S. Kristensen* 132

Critical incident stress debriefing and its effects on coping strategies and anger in a sample of Australian police officers involved in shooting incidents *Ross Leonard and Laurence Alison* 144

The derivation of a brief Student Nurse Stress Index *Martyn C. Jones and Derek W. Johnston* 162

Time management as a moderator of relations between stressors and employee strain *Steve M. Jex and Tina C. Elacqua* 182

Number 3 July–September

How the psychosocial work environment of motor vehicle mechanics may influence coping with musculoskeletal symptoms *Steffen Torp, Trond Riise and Bente E. Moen* **193**

Sense of coherence and ill health among the unemployed and re-employed after closure of an assembly plant *Jan Johansson Hanse and Tomas Engström* **204**

Construct validity of the Maslach Burnout Inventory-General Survey: a two-sample examination of its factor structure and correlates *Toon W. Taris, Paul J. G. Schreurs and Wilmar B. Schaufeli* **223**

Subjective health complaints: is coping more important than control? *Hege R. Eriksen and Holger Ursin* **238**

Absenteeism, turnover intention and inequity in the employment relationship *Sabine A. Geurts, Wilmar B. Schaufeli and Christel G. Rutte* **253**

Testing the 3-factor model of occupational stress: the impact of demands, control and social support on a mail sorting task *Ben J. Searle, Jim E. H. Bright and Stephen Bochner* **268**

The importance of knowing the affective meaning of job demands revisited *Roy L. Payne and David Morrison* **280**

Number 4 October–December

Job strain and psychotropic drug use among white-collar workers *Jocelyne Moisan, Renée Bourbonnais, Chantal Brisson, Michel Gaudet, Michel Vézina, Alain Vinet and Jean-Pierre Grégoire* **289**

The relationship between problem co-workers and quality work practices: a case study of exposure to sexual harassment, substance abuse, violence and job stress *Joel B. Bennett and Wayne E. K. Lehman* **299**

Distinguishing traumatic, vicarious and routine operational stressor exposure and attendant adverse consequences in a sample of police officers *Jennifer Brown, Jane Fielding and Jennifer Grover* **312**

Burnout, job stress and violent behaviour among Dutch police officers *Nicolien Kop, Martin Euwema and Wilmar Schaufeli* **326**

Effects of the implementation of information technology on employees' strain and job satisfaction: a context-dependent approach *Christian Korunka and Oliver Vitouch* **341**
